

### *From the Desk of the Supervisor*

#### **An Observed Concern that requires our Attention~**

Your child's Educators are working very hard with your children to teach them to walk in the hallway, stay with an adult at all times and to leave the wheelchair button for those who are confined to a wheelchair.

Safety is our first consideration and this would include asking for your support in teaching your child to walk and follow the directions and guidance of the Educator responsible for their well-being. Consistent expectations for walking in the hallway is beneficial and safe for everyone.

The wheelchair access button should not be used as a reward for reaching the doorway. This is a tool for those who are unable to open the door. Children are currently observed pushing the button and then running out of the building and into the parking lot. We do not want for an accident to occur, as cars are also seen to come down the drive and into the lot at a fast rate of speed.

I thank you in advance for your support in keeping your child safe

Over the summer, our team will be taking vacation. Supply staff have been selected to continue to provide a safe and exciting program. Notice of educator's holidays and their replacement will be posted outside your child's classroom

### **Board and Staff News**

The Board of Directors will not meet in July & August.

Meetings will recommence in September 11, 2019.

Have a safe and enjoyable Summer!

### **Special Dates**

**5-AGM (annual general meeting)**

**5-Eid ul Fitr**

**17-Father's Day**

**21-Summer begins**

**21-National Aboriginal Day**

It is important that we can connect with you, especially in the event of an emergency! Please notify the centre if any of your contact information (email or phone) has changed.

### **Here comes the sun**

Using sunscreen is very important but which one to choose? Dermatologists suggest using a sunscreens with SPF (sun protection factor) 60 against ultraviolet B (UVB), broad-spectrum blocking UVA rays plus being water-resistant using 2 tablespoons during each application. Here is the percentage of UVB rays you're protected against, according to SPF:

SPF 15=93% UVB rays,  
SPF 30= 97% UVB rays,  
SPF 60=98% UVB rays.

Apply (30 ml for body, 1 teaspoon for face) 20 min before going outside then reapply often, every 1-2 hours.

During the peak hours 11am-3pm seek shade, and cover up with tightly woven, loose fitting clothing, sunglasses and hats with a brim of at least 3 inches wide. On overcast days as much as 80% of sun's rays penetrate through, so make sure to cover up and be smart about sunscreen use even when it's not sunny.

Sunscreen forms will soon be provided for you to sign. Please sign the consent form and leave with your child's educator upon receipt.
