How Does Learning Happen

“Through play and inquiry, children develop skills such as problem solving, creative thinking, and innovating, which are essential for learning and success in school and beyond” (How Does learning Happen – pg.7).

Did you know?

“Physical activities are the most important factor for any child’s better health, wellbeing, and all-round development. Exercises and outdoor physical activities for children will help them in building strong muscles, bones, stamina, and agility, which acts as a perfect stimulus for a child’s body to adapt and healthily move forward towards a brighter future”.
