

# November

## Toddler 2 Calendar

### How Does Learning Happen?

**Well-being** - addresses the importance of physical and mental health and wellness. It incorporates capacities such as self-care, sense of self, and self-regulation skills.

### Skills we will be working on:

**1.2 Perspective** and **2.3 Empathy** – by taking in simple situations begging to take the point of view of others and showing awareness of own feelings and the feelings of others and showing concern for others. Examples we will be identifying our different emotions and friends emotions at different times of the day.

**3.2 Expressive language** - Increasing our vocabulary, combining words and using simple sentences. Examples asking for items we would like at the lunch/snack table, or asking for help.

**4.2 Problem solving** – Solving simple self-help problems by trial and error. Examples we will work on removing or putting on our jacket or shoes/boots. As well as hanging/removing our clothing items from our cubbies.

### Ideas to do at home:

A great idea is to have your toddler gather up different items that can get wet. Talk about if your child can see if it will float or sink in a container of water. (the kitchen sink might be a good place to do this as well!)

### Important dates:

November 11. Remembrance Day

**Reminders:** As the weather gets colder please make sure your child always has appropriate clothing in their cubbies, such as snow pants, winter jacket, winter boots, neck warmer and hat. Please bring extra waterproof mittens and socks as these items get wet more often. Thank you!

**Thank you** so much for joining us at our October Nature and Science Family Event. It was so great to be able to talk more with all of you. We cannot wait to see the rocks that you create and picture from an activity at home with the rock.

**Photo:** The rocks and paint from the family event.
