

Toddler 2 Calendar

Skills we will be working on:

We are working on 2.2 Self-regulation Emotion Regulation by beginning to use language to assist in emotion regulation and being overwhelmed and recovering. We are doing this by using calming breathing or safe space to feel all emotions, then going through the steps or giving the words to express emotions or needs.

How Does Learning Happen?

Working together with families, educators and the environment to benefit each child and help nurture their individual development. This month we will be having a parent event and having each family plant flowers on our playground. We will also be taking care of plants in our classroom. This will help

develop 4.8 Memory skills by increasing memory capacity and following routines to care for the plants.

Image: Learning and development happens within the context of relationships among children, families, educators, and their environments.

Ideas to do at home:

A great idea to do at home is to help take care of plants. Have a small pouring cup with water and allow them to pour the water into it. Talk about how to take care of plants, they need water, sunlight and to be gentle. This will help develop a sense of responsibility and ability to care for others. You can use existing plants or create a garden or plants inside.

We will also be sending dirt, a pot and seeds home after the parent event.

Image: Child using shovel in dirt for planting and a watering can.

Reminders: Please label your child's clothing.

Important dates:

Parent Event

Planting on the playground

Date: 8th

Time: 4:00pm – 5:00pm
